The screenshot displays the Android Studio interface. The main editor shows the `MainActivity.java` file with the following code:

```
@Override
protected void onCreate(Bundle savedInstanceState) {
    super.onCreate(savedInstanceState);
    setContentView(R.layout.activity_main);
    edtWidth = (EditText)findViewById(R.id.edt_width);
    edtHeight = (EditText)findViewById(R.id.edt_height);
    edtLength = (EditText)findViewById(R.id.edt_length);
    btnCalculate = (Button)findViewById(R.id.btn_calculate);
    tvResult = (TextView)findViewById(R.id.tv_result);
    btnCalculate.setOnClickListener(this);
    if (savedInstanceState != null){
        String hasil = savedInstanceState.getString(STATE_HASIL);
        tvResult.setText(hasil);
    }
}

@Override
public void onClick(View v) {
    if (v.getId() == R.id.btn_calculate){
        String length = edtLength.getText().toString().trim();
        String width = edtWidth.getText().toString().trim();
    }
}
```

The virtual device emulator on the right shows a screen titled "volume" with three input fields: "Panjang" (5), "Lebar" (4), and "Tinggi" (6). A purple button labeled "HITUNG" is visible, and the result "120.0" is displayed below it. The bottom status bar of the emulator shows the time as 4:51.

The bottom of the screenshot shows the Windows taskbar with various application icons and the system clock indicating 13:53 on 05/09/2021.
